

Job Title: Junior Web Developer

Location: Bangalore, India (Hybrid)

About the Role

Google is looking for a talented and motivated Junior Web Developer to join our dynamic Web Development team. As a Junior Web Developer, you will collaborate with experienced engineers and designers to build, maintain, and optimize innovative web applications that reach millions of users worldwide.

Responsibilities

- Assist in designing, coding, and modifying websites, from layout to function, according to project specifications.
- Work closely with senior developers to implement responsive and user-friendly web interfaces.
- Debug and troubleshoot issues across a variety of browsers and devices.
- Participate in code reviews and contribute to team knowledge sharing.
- Support the integration of backend services and APIs.
- Stay updated with emerging web technologies and propose improvements to existing processes.

Minimum Qualifications

- Bachelor's degree in Computer Science, Information Technology, or a related field (or equivalent practical experience).
- Proficiency in HTML, CSS, and JavaScript.
- Familiarity with at least one modern JavaScript framework (e.g., React, Angular, or Vue.js).
- Basic understanding of web performance optimization and accessibility standards.
- Strong problem-solving skills and attention to detail.
- Excellent communication and teamwork abilities.

Preferred Qualifications

- Experience with version control systems (e.g., Git).

- Exposure to backend technologies (Node.js, Python, or Java).
- Knowledge of cloud platforms (Google Cloud Platform is a plus).
- Passion for learning and growing in a fast-paced environment.

What We Offer

- Competitive salary and benefits package.
- Mentorship from industry experts.
- Opportunities for career advancement and professional development.
- A vibrant and inclusive workplace culture.
